RE: Phase I Environmental Site Assessment
Springhill Reservoir
348 North McGregor Avenue
Mobile, Alabama
SESI Project No.: M25-164

Dear Mr. Russell:

Attached herewith is our report entitled "Phase I Environmental Site Assessment – Springhill Reservoir, 348 North McGregor Avenue," dated April 29, 2025.

This report is certified to the following:

Mobile Area Water & Sewer System

SESI appreciates the opportunity to provide these services and looks forward to working with you on future assignments. If you have questions regarding information in this report or if we may be of further assistance, please do not hesitate to contact the Mobile, Alabama office at 251.445.4369.

Sincerely,

SOUTHERN EARTH SCIENCES, INC.

Stacey Guarino
Project Manager

1.0 EXECUTIVE SUMMARY

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of 348 North McGregor Avenue, Mobile, Alabama, the subject property. Any exceptions to, or deletions from, this practice are described in **Appendix A** of this report. This assessment has revealed no recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property.

FINDINGS:

A REC, according to ASTM, is defined as 1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or a likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- SESI did not identify any recognized environmental conditions (RECs) associated with the subject property.

A CRECs is a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of controls

- SESI did not identify any controlled RECs (CRECs) associated with the subject property.

HRECs are a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the property to any controls.

- SESI did not identify any historical REC (HRECs) associated with this subject property.

A de minimis condition generally does not present a material risk of harm to public health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions that are determined to be de minimis are not RECs.

- SESI did not identify any “de minimis” environmental conditions.

SIGNIFICANT DATA GAPS
Exceptions/ Data Gaps Encountered:

- Not all historical records were available dating back to 1940 or within 5-year intervals.

This exception/ data gap is not expected to alter the outcome of the report since other historical information was available.

OPINIONS & CONCLUSION:
Based on our visual inspection of the property and the limited amount of information gathered, SESI did not find any obvious indications that hazardous materials were ever improperly disposed of on or adjacent to the site. It is our opinion that the scope of this investigation has been sufficient to determine the presence and/or probability of a release of hazardous materials which may present a threat to the environment. Therefore, additional investigations for this property are not warranted at this time.

2.0 PASSAGE OF TIME AND VALIDITY OF REPORT

Report Issuance Date & Declaration by Environmental	April 29, 2025
Date of Visual Inspection of Subject and Adjoining Properties	April 25, 2025
Date of Interview with Past & Present Owners and/or Occupants	April 28, 2025
Earliest Date of Interviews, Lien Search, Record Reviews, and Inspections	April 23, 2025
Report Viability Date	October 20, 2025

3.0 INTRODUCTION

Southern Earth Sciences, Inc. (SESI) was authorized by Mr. Daryl Russell, with Mobile Area Water & Sewer System (User), to conduct a Phase I Environmental Site Assessment (ESA) on the Springhill Reservoir located at 348 North McGregor Avenue in Mobile, Alabama. The subject property consists of a portion of Mobile County Revenue Commission Parcel 2806141001067XXX. The site assessment was conducted in accordance with the guidelines outlined in the ASTM *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process Designation E 1527-21* (Practice) and SESI Proposal Number XM25-132, dated April 16, 2025.

The subject property is located in a commercially/residentially developed area. The subject property is +/-5.5 acres in size. It is situated in the northeast quadrant of Section 14, Township 4 South, Range 2 West in Mobile County, Alabama. The subject property GPS coordinates are 30º 42' 07.50"N and 88º 08' 31.12"W. The subject property is physically positioned on the west right-of-way of North McGregor Avenue. Srpinghill Avenue is approximately 925 feet north of the subject property. Topographic and Subject Property maps are included as **Figures 1 and 2**.

Purpose for Performing Phase I ESA
Specifically, an ESA is performed on a parcel of commercial real estate with respect to a range of contaminants as outlined in the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. The primary purpose of this assessment is to allow the User to potentially satisfy one of the requirements as an innocent landowner, contiguous property owner, or bona fide prospective purchaser (landowner liability protections or LLPs) for liability as outlined in CERCLA.

The ESA may or may not identify Recognized Environmental Condition(s) (RECs) or Controlled Recognized Environmental Condition(s) (CRECs) associated with regard to the property.

A REC, according to ASTM, is defined as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property due to any release to the environment; under conditions indicative of a release to the environment under conditions that pose a material threat of a future release to the environment. De minimis conditions are not RECs or controlled RECs. A CRECs is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

Additionally, the ESA may or may not identify Historical Recognized Environmental Condition(s) (HRECs). HRECs are past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

Conditions considered to be RECs, CRECs and HRECs will be listed in the evaluation section (Section 8.0).

A de minimis condition generally does not present a material risk of harm to public health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions that are determined to be de minimis are not RECs.

Scope of Work
The scope of work for this Phase I ESA is for the environmental professional to identify, to a feasible extent, pursuant to the referenced process, recognized environmental conditions in connection with the Subject Property. This is entered into voluntarily by the party/parties involved who wish to assess the environmental condition of a commercial real estate taking into account commonly known and reasonably ascertainable information.

This Phase I ESA is prepared with four components:
Records Review
Subject Property Reconnaissance
Interviews
Report and Evaluation

A detailed summary of the above components is presented in **Appendix A**.

Limitations, Exceptions, Data Gaps
SESI considers that limitations, exceptions, and deviations from the Practice manifest as a lack of or inability to obtain information required by the Practice. This represents the definition of the 'data gap' contained in the Practice.

In general, when required information was incomplete, not provided, otherwise not obtained, or indicated a need for additional information, SESI attempted to use information from other sources to meet the Practices' performance objectives.

Significant Assumptions

SESI made the following assumptions in this report:

- SESI relied on data received from secondary sources including governmental agencies, the client, representatives of the client, property owners, property owner representatives, computer databases and interviews.
- Unless reported, SESI has made no attempt to verify the accuracy and completeness of the information derived from secondary sources.
- SESI assumes information provided by or obtained from governmental agencies, including information obtained from government websites, is accurate and complete.
- Groundwater flow is assumed based on contour lines shown on the United States Geological Survey topographic maps.
- SESI assumes that the property has been correctly and accurately identified by the client, representatives of the client, property owner and property owners' representatives.
- A site is considered adjoining even if there is a road between it and the subject property.

Special Terms and Conditions

This Phase I ESA was prepared in accordance with the stated and agreed upon Scope of Work. No special terms and conditions are applicable to this Phase I ESA.

User Reliance

This report is for the use and benefit of and may be relied upon by Mobile Area Water & Sewer System or third parties authorized by Mobile Area Water & Sewer System including the lender(s) in connection with a secured financing of the property and their respective successors and assigns. Any third party use or reliance on this report shall be limited by the exceptions and limitations in the report and with the acknowledgment that actual subject property conditions may change with time, and that hidden conditions may exist at the subject property that were not discoverable within the scope of the assessment.

In order to claim protection from CERCLA liability, as an innocent landowner, bona fide prospective purchaser or contiguous property owner, the acquisition of the Subject Property should be completed within 180 days after research documentation was first consulted (refer to Section 2.0).

4.0 USER PROVIDED INFORMATION

The User is defined as the party seeking to complete the ESA of the subject property. The user may include, without limitation, a potential purchaser of the subject property, a potential tenant of the subject property, an owner of the subject property, a lender, or a property manager. The User has specific obligations for completing the application of this Practice as outlined below. The User provided information does not relieve the environmental professional of satisfying any of the below responsibilities, if required, to complete All Appropriate Inquiries.

Environmental Liens or Activity & Use Limitations
Mr. Daryl Russell, with Mobile Area Water & Sewer System, does not have any specialized knowledge regarding environmental liens or activity & use limitations associated with the subject property.

Specialized Knowledge
Mr. Russell indicated that the subject property has been used as a potable groundwater storage reservoir for approximately 100 years.

Relationship of the Purchase Price to the Fair Market Value
According to Mr. Russell this is not applicable since it is not part of a real estate transaction.

Commonly Known or Reasonably Ascertainable Information
Mr. Russell is aware that there has been a reservoir present on the subject property.

The Degree of Obviousness of the Presence or Likely Presence of Contamination at the Property
Mr. Russell does is not aware of any potential contamination present at the subject property.

Title Records
Information regarding previous ownership or use of the site, which may be material in identifying RECs, was not provided.

A copy of the User Questionnaire completed by Mr. Russell is included in **Appendix E**.

5.0 SUBJECT PROPERTY RECONNAISSANCE

The subject property reconnaissance was conducted on Friday, April 25, 2025, by Ms. Stacey Guarino with SESI. The subject property visit consisted of a walk over the perimeter of the subject property and neighboring properties and a drive along streets surrounding the subject property perimeter. Weather conditions at the time of the subject property reconnaissance was sunny and humid with a temperature around 80 degrees Fahrenheit. Photographs depicting conditions observed during the subject property visit are provided in **Appendix B**.

Current Use of Subject Property
An out of use water reservoir is present on the subject property.

Descriptions of Structures, Roads, and Other Subject Property Improvements
Subject property improvements include:

- One reservoir
- Chain link fencing

Utilities
The following is a list of utilities utilized at the site:

Table 1: Subject Property Utilities

Utility	Provider
Electricity	None
Natural Gas	None
Sanitary Sewage	None
Potable Water	None
Solid Waste Removal	None

Adjoining Properties
The following is a list of adjoining properties:

Table 2: Adjoining Property Use	
Direction	Usage
North	Mordecai Lane followed by residential
South	Residential
East	Springhill Grave Yard
West	James E Laier Central Laboratory and Pretreatment Department of the Mobile Area Water & Sewer System

The adjacent properties do not have registered underground storage tanks and are not registered generators of hazardous waste. In addition, no observations were made of the adjoining properties which might indicate a potential REC, such as a gas station, a dry cleaner, spills or leaks.

Subject Property Overview

Access to the subject property can be gained from the north side via an entrance on Mordecai Lane. The access road is one way; therefore the exit is situated on the west side on to McGregor Avenue. All facilities are present on the west side with the exception of the reservoir which is located within the eastern half. A grassy area separates the facilities from the reservoir.

Table 3: Subject Property Observations

	Subject Property		Adjoining	
	Yes	No	Yes	No
Underground Storage Tanks (USTs)		X		X
Aboveground Storage Tanks (ASTs)		X	X	
Transformers		X		X
Pits or lagoons		X		X
Stained soil or pavement, stressed vegetation		X		X
Solid waste		X		X
Wastewater		X		X
Wells		X		X
Septic systems		X		X
Odors		X		X
Pools of liquid		X		X
Drums (including 5 gallon buckets)		X		X
Hazardous substances and petroleum product containers		X		X
Unidentified substance containers		X		X

Aboveground Storage Tanks
There are multiple ASTs located on the west adjoining property:

- One approximately 1,000-gallon AST used in connection with an emergency power generator used:
- One 3,500-gallon Diesel ASTs used in connection with a portable water pump station and generator; and
- One (size unknown) diesel AST in connection with an emergency power generator connected to the communications equipment building.

There were no indications of spills, releases or potential concerns associated with the ASTs.

6.0 SUBJECT PROPERTY HISTORY AND RECORDS REVIEW

In an effort to identify historical practices or conditions which may have impacted the site, past land uses were investigated through a review of historical records. SESI researched prior use of the property through readily available, practically reviewable record sources.

Topographic Map
Environmental Data Resource (EDR) provided topographic maps for 1940, 1943, 1944, 1953, 1967, 1974, 1982, 1985, 2014, 2018 and 2020. Based on the USGS Springhill, Alabama, Quadrangle Topographic Map 1953, photo-revised 1982, the subject property is located approximately 22-24 feet above mean sea level (msl) and has a generally level topography. The direction of groundwater flow in the uppermost aquifer generally conforms to the topography in the area, which would indicate a western or eastern flow direction depending on location within the subject property.

Table 4: Topographic Maps

Year	Subject Property Description	Adjoining/Adjacent Description
1940	The subject property is developed with the reservoir.	The grave yard is present to the east and residences are visible to the north, south and west.
1943, 1944 & 1953	No significant changes were observed.	No significant changes were observed.
1967		The adjoining properties are shown as a built up area.
1974, 1982 & 1985		No significant changes were observed.
2014, 2018 & 2020	No specific details were depicted.	No specific details were depicted.

No potential concerns were noted with the subject property and surrounding properties. The EDR *Historical Topo Map Report with QuadMatch*™ is included in **Appendix C** and a topographic map has been included as **Figure 1**.

Surface Water Bodies
There are no surface waters on the subject property. The nearest surface water body is Springhill Lake located approximately ½ mile northwest from the subject property.

Geology
The United States Department of Agriculture (USDA) Web Soil Survey was reviewed in an effort to determine the soil type associated with the subject property investigated. The major soil type found was the Wadley-Urban. This soil type is classified under the Unified Soil Classification System as loamy, fine sand with a seasonal high water table that is expected to be greater than six feet below ground surface.

Aerial Photography

In an effort to determine historical land use that may have involved hazardous substances, SESI reviewed historical aerial photographs for the subject property and surrounding areas. The following aerial photographs were reviewed.

1938, 1950, 1955, 1960, 1966, 1974, 1985, 1988, 1992, 1997, 2006, 2011, 2015 and 2019 – EDR

Table 5: Aerial Photographs

Year	Subject Property Description	Adjoining/Adjacent Description
1938	The reservoir is present.	The poor quality of the image makes the adjoining properties indeterminant.
1950	No significant changes were observed.	The property to the west is undeveloped with the exception of a pond. Residential is present to the north and south. A residence is present to the east at the northeast corner of the subject property.
1955		The only change is the absence of the pond to the west but the addition of a water tower.
1960		No significant changes were observed.
1966		The only change is the addition of a structure west of the water tower.
1974		No significant changes were observed.
1985		The only change is the addition of more structures to the west and the residence to the east is no longer present.
1988, 1992, 1997, 2006, 2011, 2015 & 2019		No significant changes were observed.

Based on the review of aerial photographs, no items of environmental concern, such as landfills or dumping, were observed in the reviewed aerial photographs. The EDR *Aerial Photo Decade Package* is included in **Appendix C.**

Sanborn Fire Insurance Maps
The Sanborn Map Company produced maps of urban areas and gave existing structure ratings for fire insurance purposes. EDR provided Sanborn maps for the following years: 1950, 1956, 1964, 1967 and 1981.

Table 6: Sanborn Maps

Year	Subject Property Description	Adjoining/Adjacent Description
1950	The subject property is shown with a 10,000,000 gallon city reservoir.	Residences are to the south and east; to the west is a water tower and the north is shown as undeveloped.
1956	No significant changes were observed.	No significant changes were observed.
1964	The only change is the addition of a pumping station in the northwest corner.	The only change is the addition of a pumping station to the west.
1967 & 1981	No significant changes were observed.	No significant changes were observed.

A copy of the EDR *Certified Sanborn® Map Report* is included in **Appendix C**.

Historical City Directories
EDR provided historical city directories information. EDR consulted the EDR Digital Archives, Polk and the Cole Information directories for the following years: 1920, 1926, 1930, 1935, 1940, 1946, 1951, 1957, 1961, 1966, 1971, 1975, 1981, 1985, 1990, 1992, 1995, 1996, 2000, 2005, 2009, 2014, 2017 and 2020. The subject property shares an address with the west property.

Subject Property

Year	Occupant
1975-1995	County Civil Defense
1985-2017	Mobile County Emergency Management Agency

No tenants or adjoining tenants of potential concern were noted. A copy of the EDR *City Directory Abstract Report* is included in **Appendix C**.

Property Tax Files
According to the Mobile County Revenue Commission the title is vested in Water & Sewer Board.

Recorded Land Title Records
Recorded land title records were not accessed as part of this assessment.

Building Department Records
Building records were reviewed in an effort to determine if any permits were issued that might indicate a potential environmental concern via EDR Lightbox application. Multiple

permits were identified for the subject property of which three were indicated to be for aboveground storage tanks.

ADEM Representative
(records@adem.alabama.gov, April 29, 2025)
Ms. Azure Jones with ADEM was contacted in an attempt to discover if any records were on file for the property that might pose an environmental concern. Ms. Jones indicated she was unable to locate any files for the subject property.

Zoning/Land Use Records
According to the Mobile County Revenue Commission the subject property is zoned R-1 (single family residential).

Previous Assessments
No previous reports were submitted to SESI for review.

7.0 STANDARD ENVIRONMENTAL RECORDS REVIEW

A review of databases from federal, state, and local environmental regulatory agencies was conducted to identify use, generation, storage, treatment or disposal of hazardous materials and chemicals or release incidents of such materials, which may impact the site. EDR was retained to perform the database search. The databases identified on the EDR *Radius Map™ Report with Geocheck®* **(Appendix D)** have been examined in an effort to locate sites that lie within search distances specified by the ASTM standard.

Federal Records

The federal environmental databases listed below were reviewed to obtain information pertaining to the Subject Property and properties within the listed approximate search distance. These databases are maintained by the United States Environmental Protection Agency (EPA).

Table 7: Federal Databases Searched in Regulatory Review

Federal Database	Search Distance
National Priorities List (NPL) Superfund Sites	One mile
Federal Delisted NPL Sites	One-half mile
Federal Sites subject to CERCLA removals and CERCLA order	One-half mile
Federal CERCLA site with No Further Remedial Action Planned (NFRAP)	Subject Property and adjoining properties
Federal RCRA facilities undergoing Corrective Action	One mile
Resource Conservation and Recovery Act (RCRA) - for Treatment, Storage, and Disposal facilities (TSDs)	One-half mile
Federal RCRA Generators	Subject Property and adjoining properties
Federal Institutional Control/Engineering Control Registries	Subject Property only
Emergency Response Notification System (ERNS)	Subject Property only

State Records

The state environmental databases listed below were reviewed to obtain information pertaining to the Subject Property and properties within the listed minimum search distance of the site. Unless otherwise noted, the following records are maintained by the Alabama Department of Environmental Management (ADEM).

Table 8: State Databases Searched in Regulatory Review

State Database	Search Distance
State & Tribal Equivalent NPL	One mile
State & Tribal Hazardous Waste Facilities	One-half mile
State & Tribal Leaking Storage Tanks	One-half mile
State & Tribal Registered Storage Tanks	Subject Property and adjoining properties
State & Tribal Institutional Control/Engineering Control Registries	Subject Property only
State & Tribal Voluntary Cleanup Site	One-half mile
State & Tribal Brownfield Sites	One-half mile
State & Tribal Permitted Landfill & Solid Waste Facilities (SWF)	One-half mile

Environmental Records Found
When evaluating the facilities in the environmental database the following conditions were considered:

- The database on which a facility was listed.
- The distance of a facility from the subject property.
- The inferred or topographic groundwater flow direction. The expected topographic groundwater flow direction at the subject property is expected to be to the east.
- Any obstructions including railroads, interstates, water bodies.

Following a review of the environmental database the following facilities were identified within the specific search radius and warranted additional examination and/or clarification:

AL AST Database: Mobile County Emergency Mngmt Agency, North McGregor Avenue, adjoining the subject property to the west. This facility is listed as maintaining two ASTS (1,000 gallon and 6,000 gallons). There have been no reported releases associated with the ASTs.

AL UST Database: Mobile County Emergency Mngmt Agency, North McGregor Avenue, adjoining the subject property to the west. This facility formerly maintained two USTs. They were installed in 1990 and last used in 1993. There had been no reported releases associated with the USTs.

AL UST Database: MAWSS Springhill Booster Station, North McGregor Avenue, adjoining the subject property to the west. This facility formerly maintained one UST. A release was reported in 1993. A no further action (NFA) was issued.

Orphan summary sites are facilities which are not plotted by EDR due to insufficient address or location information. No orphan summary sites were listed.

Other Records Reviewed

UST Regulatory Sites: The subject property was not plotted on this ADEM E-map.

UST Incident Sites: The subject property was not plotted on this ADEM E-map.

Brownfield Sites: The subject property was not plotted on this ADEM E-map.

Alabama Oil & Gas Board: No oil or gas wells were identified on the subject property.

In addition, Vapor Encroachment Screening criteria were reviewed per ASTM Designation E2600-10. Vapor Encroachment Screening (VES) is defined as the presences or likely presence of chemicals of concern (COC) vapors in the subsurface of the subject property caused by the release of vapors from contaminated soil or groundwater either on or near the subject property.

Table 9: Vapor Encroachment Screening

Federal Database	COCs	Petroleum Hydrocarbon COC
National Priorities List (NPL)	One-third mile	One-tenth mile
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)	One-third mile	One-tenth mile
Resource Conservation and Recovery Information System (RCRIS) - for Treatment, Storage, and Disposal facilities (TSDs) CORRACTS	One-third mile	One-tenth mile
RCRIS – TSDs, non-CORRACTS	One-third mile	One-tenth mile
RCRIS - for Hazardous Waste Generators	Subject Property only	Subject Property only
Emergency Response Notification System (ERNS)	Subject Property only	Subject Property only
Federal Institutional Controls/Engineering Control Registries	Subject Property only	Subject Property only
State Database		
State & Tribal Equivalent NPL	One-third mile	One-tenth mile
State & Tribal Equivalent CERCLIS	One-third mile	One-tenth mile
State & Tribal Leaking Underground Storage Tanks (LUST) List	One-third mile	One-tenth mile
State & Tribal Voluntary Clean Up Sites	One-third mile	One-tenth mile
State & Tribal Brownfield Sites	One-third mile	One-tenth mile
Permitted Solid Waste Facilities (SWF)	One-third mile	One-tenth mile
State & Tribal Institutional Controls/Engineering Control Registries	Subject Property only	Subject Property only
State & Tribal Registered USTs (UST)	Subject Property only	Subject Property only

Based on the information reviewed vapor encroachment is not expected to be a concern.

8.0 INTERVIEWS

The objective of the interview process is to obtain information regarding the subject property history and any recognized environmental condition associated with the property.

Property Owner Representative
Mr. Daryl Russell was interviewed during the course of this assessment. According to Mr. Russell, a reservoir has been on the subject property approximately 100 years. He is unaware of any environmental liens or activity and use limitations associated with the property.

9.0 EVALUATION

We have performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations of the ASTM Practice 1527-21 of 348 North McGregor Avenue, Mobile, Alabama.

Findings

A REC, according to ASTM, is defined as 1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or a likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- SESI did not identify any recognized environmental conditions (RECs) associated with the subject property.

A CRECs is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- SESI did not identify any controlled RECs (CRECs) associated with the subject property.

HRECs are past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- SESI did not identify any historical REC (HRECs) associated with this subject property.

A de minimis condition generally does not present a material risk of harm to public health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions that are determined to be de minimis are not RECs.

- SESI did not identify any "de minimis" environmental conditions.

Opinions & Conclusion
Based on our visual inspection of the property and the limited amount of information gathered, SESI did not find any obvious indications that hazardous materials were ever improperly disposed of on or adjacent to the site. It is our opinion that the scope of this investigation has been sufficient to determine the presence and/or probability of a release of hazardous materials which may present a threat to the environment. Therefore, additional investigations for this property are not warranted at this time.

10.0 SIGNIFICANT DATA GAPS

Exceptions/ Data Gaps Encountered:

- Not all historical records were available dating back to 1940 or within 5-year intervals.

This exception/ data gap is not expected to alter the outcome of the report since other historical information was available.

11.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 312.10 of 40 CFR312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Stacey Guarino

APPENDIX A

SCOPE OF WORK
LIMITATIONS & EXCEPTIONS

SCOPE OF WORK

Subject Property and Adjoining Property Observations

Visual observations of the site, structures, and surrounding properties were made to identify potential sources or indications of chemical contamination such as underground storage tanks (USTs), aboveground storage tanks (ASTs), potential sources of polychlorinated biphenyls (PCBs), chemicals and hazardous materials, and areas with surface stains or stressed vegetation. In addition, the immediately adjoining properties were observed from the site, without being entered, for potential sources of contamination or environmental impairment, which could likely migrate to the subject property via surface water runoff, groundwater transport, or other pathways.

Geologic Information

A review was made of available published geological and groundwater information obtained from the United States Geological Survey and other referenced sources for the subject property vicinity.

Historical Review

A review of reasonably ascertainable information such as Sanborn maps, city directories and aerial photographs was conducted to evaluate previous land use.

Regulatory Records Review

Environmental Data Resource (EDR) was retained to perform the government records search requirements outlined by the ASTM standard. The following regulatory databases were reviewed to identify use, generation, storage, treatment, or disposal of hazardous materials, or releases of such materials that may impact the site: National Priorities List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); CERCLIS No Further Remedial Action Planned (NFRAP); Resource Conservation and Recovery Information System-Treatment, Storage, and Disposal facilities (RCRIS-TSDs) and Corrective Action Facilities (CORRACTS); RCRIS Large Quantity Generators (RCRIS-LQG); RCRIS Small Quantity Generators (RCRIS-SQG); Emergency Response Notification System (ERNS); an in house database for state records are maintained by the Alabama Department of Environmental Management (ADEM) and include the Leaking Underground Storage Tank (LUST) List, Permitted Solid Waste Facilities (SWF), and Alabama Registered Underground Storage Tanks (UST).

Interviews with Subject Property Representatives
Subject property representatives and other persons familiar with the Subject Property were interviewed with regard to the possible past or present use of hazardous substances and petroleum products at the site.

Municipal Records Review
Contact with certain regulatory agencies such as local building and health departments and fire officials as to relevant historical information regarding the Subject Property and surrounding parcels.

Prior Report Review
When provided, a review was made of previous environmental assessments and records of previous environmentally related activities with the purpose of identifying RECs.

LIMITATIONS & EXCEPTIONS

SESI has prepared this Phase I Environmental Site Assessment using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances or petroleum products at the property. The scope of work for this Phase I ESA was consistent with the ASTM E 1527-21. Findings within this report are based on information collected from observations made on the day of the Subject Property investigation and from reasonably ascertainable information obtained from governing public agencies and referenced sources.

Reasonable efforts have been made during this assessment of aboveground and underground storage tanks and ancillary equipment. "Reasonable efforts" are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify subsurface equipment that may have been hidden from view due to paving, construction or debris pile storage, or incorrect information from sources.

The database search focuses on the property and neighboring properties that could impact the property. Neighboring properties listed in governmental environmental records are identified within specific search distances. The search distance varies depending upon the particular government record being checked. The regulatory research is designed to meet the requirements of ASTM E 1527-21.

Our conclusions regarding the potential environmental impact of nearby off-site facilities are based on readily available information from the environmental databases and the assumed groundwater flow direction. A detailed file review of each facility was beyond the scope of work. Actual groundwater conditions, including direction of flow, can only be determined through the installation of monitoring wells.

Regardless of the findings stated in this report, SESI is not responsible for consequences or conditions arising from facts that were concealed, withheld, or not fully disclosed at the time the assessment was conducted. SESI makes no other representation to any third party except that it has used the degree of care and skill ordinarily exercised by environmental consultants in the preparation of the report and in the assembling of data and information related thereto. No other warranties are made to any third party, either expressed or implied.

It should be noted that all surficial environmental assessments are inherently limited in the sense that conclusions are drawn and recommendations developed from information obtained from limited research and site evaluation. For these types of evaluations, it is often necessary to use information prepared by others and SESI cannot be responsible for the accuracy of such information. In addition, the passage of time may result in a

change in the environmental characteristics at this Subject Property and surrounding properties. This report does not warrant against future operations or conditions, nor does it warrant operations or conditions present of a type or at a location not investigated. This report is not a regulatory compliance audit and is not intended to satisfy the requirements of any state, federal, or local real estate transfer laws.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques. Subsurface conditions were not field investigated as part of this study and may differ from the conditions implied by the surficial observations. This study is not intended to assess or otherwise determine if any soil contamination, waste emplacement, or groundwater contamination exists. These data are accessible only by subsurface material and groundwater sampling through the completion of soil borings and the installation of monitoring wells. The scope of work, determined by the client, did not include these activities.

This report is not definitive and should not be assumed to be a complete or specific definition of all conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other construction purposes. SESI makes no representation or warranty that the past or current operations at the property are or have been in compliance with all applicable federal, state and local laws, regulations and codes.

It must be noted that no investigation can absolutely rule out the existence of any hazardous materials at a given site. This assessment has been based upon prior Subject Property history and observable conditions. Existing hazardous materials and contaminants can escape detection using these methods. If a higher level of confidence is required that can be defined by the Phase I scope of work, then additional investigation would, of course, be required.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Southern Earth Sciences, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Southern Earth Sciences, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state and tribal landfills and solid waste disposal facilities

GA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Natural Resources' Operating Solid Waste Facilities' list.

A review of the GA SWF/LF list, as provided by EDR, and dated 12/19/2024 has revealed that there is 1

GA SWF/LF site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
DRC MEDICAL WASTE SE Permit Number: PBR-160-23COL Operating Status: Operating	740 MUSEUM DRIVE	WNW 1/8 - 1/4 (0.217 mi.)	C7	19

Lists of state and tribal leaking storage tanks

AL LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Management's Leaking Underground Storage Tank Listing.

A review of the AL LUST list, as provided by EDR, and dated 10/31/2024 has revealed that there are 4 AL LUST sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

AL UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Management's UST Data with Owner/Site/Tank Information database.

A review of the AL UST list, as provided by EDR, and dated 10/04/2024 has revealed that there are 3 AL UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EPA ID:: ALR000062075

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 2 UST FINDER sites within approximately 0.25 miles of the target property.

MOBILE COUNTY EMERGE	348 NORTH MCGREGOR A	0 - 1/8 (0.000 mi.)	A4	14
FIRESTONE STORE # 05	4356 OLD SHELL RD	S 1/8 - 1/4 (0.235 mi.)	D13	47

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 4 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there are 5 E MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Exclusive Recovered Govt. Archives

EXECUTIVE SUMMARY

AL RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from Department of Environmental Management in Alabama.

A review of the AL RGA LUST list, as provided by EDR, has revealed that there is 1 AL RGA LUST site within approximately 0.001 miles of the target property.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

HWS DETAIL: Alabama Hazardous Substance Cleanup Fund Annual Report

The Alabama Hazardous Substance Cleanup Fund (AHSCF) was established in 1989 by act of the Alabama Legislature (Code of Alabama 1975, 22-30A) to provide a mechanism for ADEM to investigate, remediate, and monitor hazardous substance sites. These sites may potentially endanger human health and the environment, but may not qualify to be addressed by other federal or state cleanup programs.

INST CONTROL: Land Division Brownfields 128(a) Program Site Listing

Institutional Controls (ICs) are non-engineered instruments, such as administrative and/or legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of a remedy by limiting land or resource use. There are five different types of controls. These are governmental, proprietary, enforcement tools with IC components, informational devices and unrestricted. Unrestricted- No institutional controls (unrestricted for industrial and residential use). Governmental- controls implemented and enforced by state and local governments. (zoning restrictions, ordinances, building permits, etc.). Proprietary- controls which have their basis in real property law (easements, covenants). Enforcement and Permit Tools with IC components- these controls are issued to compel land owners to limit certain site activities on both federal and private sites. Informational devices- informational tools with provide information or notification that residual or capped contamination may remain on site (deed or hazard notices).

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

East Map:	16646113 MOBILE, AL
Version Date:	2020

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

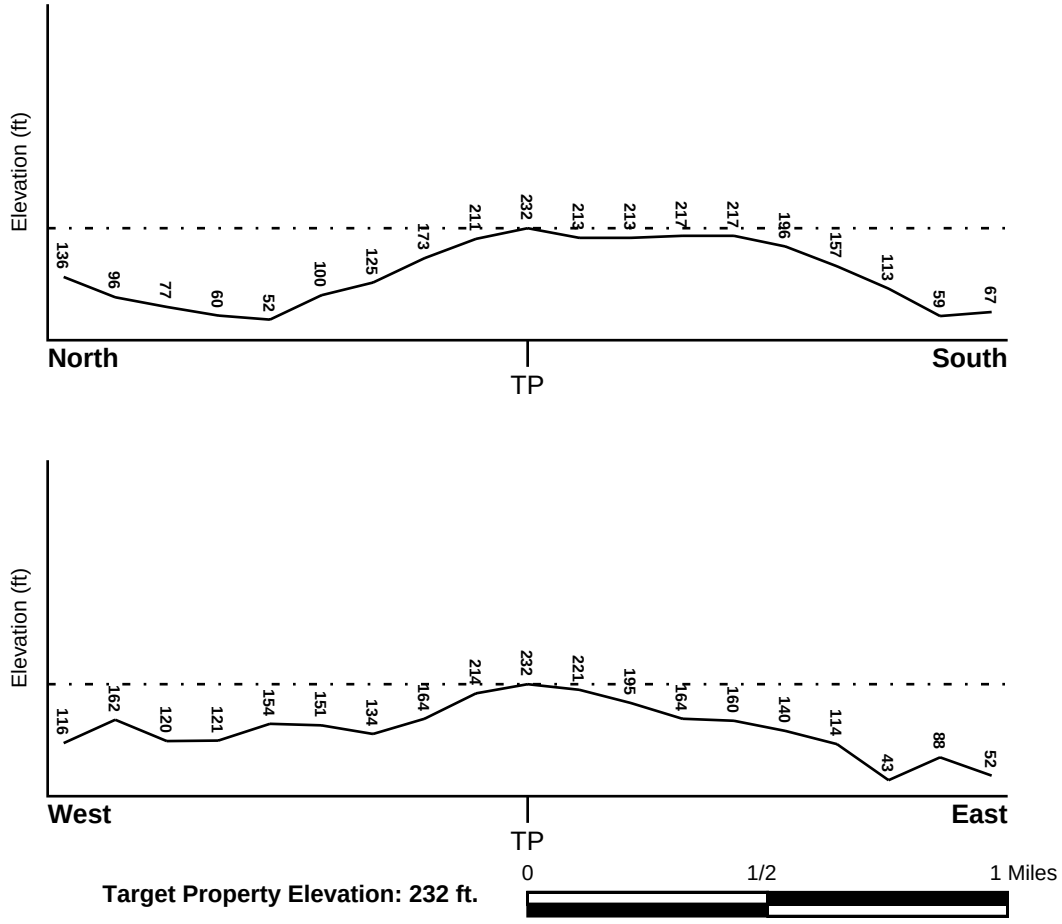
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 232 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
01097C0534K	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
01097C0533K	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
SPRING HILL	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Troup

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	3 inches	loamy sand	A-1-b	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 5.5 Min: 4.5
2	3 inches	68 inches	loamy sand	A-1-b	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 5.5 Min: 4.5
3	68 inches	85 inches	sandy loam	A-1-b	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 5.5 Min: 4.5

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Benndale

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 5.5 Min: 4.5
2	11 inches	72 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 5.5 Min: 4.5

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Data

Telephone: 334-844-3927

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

APPENDIX E

SUPPORTING DOCUMENTATION

User Questionnaire
Questions For the User of the Phase I Environmental Site Assessment [(1)]

Individual Spoken with: Daryl Russell
Organization:MAWSS
Phone Number: 251-694-3197

Project Number: M25-164
Project Name: _Springhill Resevoir _
Date 04/24/2025

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments"*) the User must conduct the following inquires required by 40 CFR 312.25, 312.28, 312.29, 312.30 and 312.31. These inquiries must also be conducted by the EPA Brownfiels Assessment & Characterization grantees. The User should provide the following information to the Environmental Professional. Failure to conduct these inquiries could result in a determination that *"all appropriate inquiry"* is not complete.

(1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Did a search of recorded land title records (or judicial records, where appropriate) identify any environmental liens filed or recorded against the *property* under federal, tribal, state or local law? If so, please explain.

No search conducted.

(2) Activity and land use limitations (AUL) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Did a search of recorded land title records (or judicial records, where appropriate) identify any AULs such as *engineering/institutional controls* that are in place at the *property* and/or have been filed or recorded in a registry under federal, tribal, state or local law? If so, please explain.

No search conducted.

(3) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business? If so, please explain.

Site has been utilized as a potable water ground storage reservoir for approximately 100 years.

(4) Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*? If not, please explain.

N/A

(5) Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example,

(a.) Do you know the past uses of the *property*? If so, please explain.

Potable water ground storage reservoir.

(b.) Do you know of specific chemicals that are present or once were present at the *property*? If so, please explain.

No

(c.) Do you know of spills or other chemical releases that have taken place at the *property*? If so, please explain.

No

(d.) Do you know of any environmental cleanups that have taken place at the *property*? If so, please explain.

No

(6) The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of releases at the *property*? If so, please explain.

No

[1] Italicized terms referenced in this questionnaire are defined in the ASTM E 1527-05 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

APPENDIX F

QUALIFICATIONS

Stacey Guarino
Eric Guarino

QUALIFICATIONS

STACEY GUARINO

Mrs. Guarino has been working with Southern Earth Sciences since October 2003. Mrs. Guarino has worked in the environmental industry prior to graduation from Florida Atlantic University. Her experience includes soil and groundwater remediation, soil analysis and classification, site investigations including Phase I and Phase II environmental audits, and tank closures.

ERIC A. GUARINO

Mr. Guarino has over 20 years' experience in site investigations and environmental remediation. This experience includes supervision of drilling operations including the design and installation of field monitoring equipment such as wells and piezometers to aid in the evaluation of subsurface conditions. He has personally supervised the removal of underground storage tanks, developed remediation plans for soil and groundwater contamination and installed/operated systems ranging from air sparging with soil vapor extraction and liquid ring or submersible pump groundwater treatment systems.
